## Basic Resistor Calculations

## Calculate the Total Resistance of resistors in series...

Simply add the values of the resistors
Total Resistance $=\mathrm{R} 1+\mathrm{R} 2+\mathrm{R} 3$
If each resistor is 10 ohms, total resistance is 30 ohms
Resistors in series

Calculate Total Resistance of Resistors in Parallel...
Invert the value of each resistor, and them together and invert the result. If each resistor is 10 ohms...

Add the inverted values $.1+.1+.1=.3$ (.where $1=1 / 10$ )
Invert the .3 to get the total resistance of 3.33 ohms...

Parallel resistors

$\frac{1}{\text { Rsum }}=\frac{1}{R 1}+\frac{1}{R 2}+\frac{1}{R 3}$

When you have combinations of series and parallel resistors, simplify the circuit by calculating the resistance of each series or parallel group independently. Do the paralleled resistor groups first...

The 100 ohm and 50 ohm resistors are in parallel.
100 inverted $(.01)+50$ inverted $(.02)=.01$
Invert .03 to get the total resistance of the two $=33.3$ ohms.
The two parallel resistors are the same as a single 33.3.ohm
The series circuit remains with the 80 ohm resistor and the 33.3 ohm calculated. Simply add them to get 113.3 ohms total.

The standard resistor color code table:

| Color | Digit 1 | Digit 2 | Digit 3* | Multiplier | Tolerance | Temp. Coef. | Fail Rate |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Black | 0 | 0 | 0 | $\times 10^{0}$ |  |  |  |
| Brown | 1 | 1 | 1 | $\times 10^{1}$ | $\pm 1 \%$ (F) | $100 \mathrm{ppm} / \mathrm{K}$ | 1\% |
| Red | 2 | 2 | 2 | $\times 10^{2}$ | $\pm 2 \%$ (G) | $50 \mathrm{ppm} / \mathrm{K}$ | 0.1\% |
| Orange | 3 | 3 | 3 | $\times 10^{3}$ |  | $15 \mathrm{ppm} / \mathrm{K}$ | 0.01\% |
| Yellow | 4 | 4 | 4 | $\times 10^{4}$ |  | $25 \mathrm{ppm} / \mathrm{K}$ | 0.001\% |
| Green | 5 | 5 | 5 | $\times 10^{5}$ | $\pm 0.5 \%$ (D) |  |  |
| Blue | 6 | 6 | 6 | $\times 10^{6}$ | $\pm 0.25 \%$ (C) |  |  |
| Violet | 7 | 7 | 7 | $\times 10^{7}$ | $\pm 0.1 \%$ (B) |  |  |
| Gray | 8 | 8 | 8 | $\times 10^{8}$ | $\pm 0.05 \%$ (A) |  |  |
| White | 9 | 9 | 9 | $\times 10^{9}$ |  |  |  |
| Gold |  |  |  | $\times 0.1$ | $\pm 5 \%$ (J) |  |  |
| Silver |  |  |  | $\times 0.01$ | $\pm 10 \%$ (K) |  |  |
| None |  |  |  |  | $\pm 20 \%$ (M) |  |  |
